**The number of profiles to be shared in a profile pack will be decided by the complexity of the skill and the experience level required for the position(s).*

How It Works

- You define your hiring requirements such as the skillset, experience level, educational qualifications, location, salary range, designation, number of open positions, date of joining etc.

- We give you a few sample profiles (minus their contact and employer details) within 7 working days of receiving the complete requirement from you.

- After agreeing on the degree of match of the sample profiles with your expectations (and modifying the requirement definition if required), we give you a mutually agreed-upon* number of screened, ready-to-join profiles within a stipulated period of time*.

- You pay us for as many profiles as are needed to fulfil your requirement.

- In addition, you pay us an amount equaling 2.5% of the annual CTC of the position upon completion of placement.

**The number of profiles to be shared and the time needed for it will be decided by the complexity of the skill and the experience level required for the position(s).*
